PROFESSIONAL SUMMARY

Full-stack developer who builds accessible, AI-powered web applications with React, Node.js, TypeScript, and MongoDB. Shipped production features on an AI grant-management platform, including role-based authentication, document-analysis integration, and subscription UI. Accessibility specialist with WCAG 2.1 AA expertise grounded in lived experience as a visually impaired developer, and a track record of civic tech projects that make complex systems usable for the people who need them most.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React, Next.js, Vite, Tailwind CSS, Radix UI, Recharts, responsive and component-based design

Backend & Data: Node.js, Express, RESTful API design, MongoDB (Mongoose), PostgreSQL (Prisma, Neon), SQLite, JWT and Clerk authentication, Socket.io

AI & Cloud: Retrieval-augmented generation (RAG), vector search, OpenAI and Gemini APIs, prompt engineering, AWS fundamentals, Vercel, Docker

Accessibility: WCAG 2.1 AA, screen reader testing (NVDA, VoiceOver), Axe DevTools, WAVE, ARIA patterns

Workflow: Git, GitHub, GitHub Actions CI/CD, Vitest, Playwright, Postman, Agile/Scrum, JIRA, code reviews

PROFESSIONAL EXPERIENCE

Full Stack Developer — Banyan Labs LLC

Phoenix, AZ | August 2025 – February 2026

- Built core features for ProcurePath, an AI-powered grant management platform that helps nonprofits find, match, and track grant opportunities.
- Developed the authentication and authorization system with JWT and role-based access control.
- Designed and optimized MongoDB schemas for grant document storage and AI analysis results.
- Built React components for the document-analysis dashboard and grant-matching interface, and implemented the REST endpoints behind document upload, processing, and reporting.
- Integrated AI document analysis and scoring into the platform, and created responsive UI for the freemium pricing and subscription flows.

Full Stack Web Developer (Apprenticeship) — Persevere

Phoenix, AZ | August 2024 – June 2025

- Built accessible, responsive web applications with React, Node.js, Express, and MongoDB in a collaborative Agile team.
- Designed REST APIs, integrated automated testing into builds, and conducted peer code reviews.
- Applied UX heuristics, accessibility testing, and Core Web Vitals analysis across projects.

Shelter Coordinator & Housing Advocate — Coalition for Compassion and Justice

Prescott, AZ | 2016 – 2018

- Maintained precise documentation and data accuracy across multi-agency systems while advocating for accessible, clear client communication.

Call Center Manager / GUI Programmer — Turn Key Solutions

Glendale, AZ | 2012 – 2016

- Supported front-end interface rollouts for tablet platforms used by major digital publications; led user acceptance testing and supervised CMS updates and data accuracy.

PROJECTS

Be In The Know / Just Ask JO — AI legal rights education platform | beintheknowjustaskjo.com

- Built a legal rights education platform for people navigating reentry, featuring JO, an AI assistant that answers questions on voting, expungement, housing, employment, police interactions, and supervision across all 50 states plus federal law.
- Engineered a retrieval-augmented generation (RAG) chat system with Next.js, MongoDB Atlas Vector Search, and Gemini embeddings that answers only from human-approved, cited legal sources — and declines when no approved source exists.

- Automated legislative monitoring with a LegiScan pipeline (Vercel cron) that flags law changes for human review; built the admin review dashboard, streaming chat with quota enforcement, and privacy-first accounts (hashed IPs, bcrypt, self-service deletion).

ProcurePath — AI grant management platform (Banyan Labs) | procurepath.ojt.banyanlabs.io

- Team-built AI-powered grant platform helping nonprofits summarize, match, and track grant opportunities — Next.js and TypeScript frontend, Express backend, MongoDB, Clerk authentication, and Docker.
- Contributed role-based access control, database schemas for grant documents and AI analysis results, document-analysis dashboard components, and REST endpoints for upload, processing, and reporting.

Four Tables — family recipe archive | jozewski.tech

- Designed and shipped a full-stack recipe archive preserving Italian, Dutch, German, and Mexican family traditions — Next.js, React, TypeScript, Prisma, and PostgreSQL (Neon), with public browsing by tradition, holiday, and category.
- Built contributor-only content management with signed HTTP-only cookie sessions, image uploads, family notes, and OpenAI-assisted recipe drafting; added SEO structured data and tested with Vitest and Playwright.

EDUCATION & CERTIFICATIONS

- AI Engineering Principles — Columbia University (in progress)
- AWS Cloud Practitioner Essentials — Amazon Web Services (2025)
- Full Stack Web Development — Persevere Coding Program (2024–2025)
- Learn Python Specialization — Scrimba (2025)
- Prompt Engineering for ChatGPT — Vanderbilt University (2025)
- IBM Data Analytics Certificate — Coursera (2023)
